

# Brittany Green

## interests about me

I've always loved mathematics. I love figuring out problems and finding out *why* something exists the way it does. Journalism is fairly new to me; a last-minute decision to take a photography class a few years ago brought a second love to my life.

I have two seemingly opposite and incompatible passions, but I've managed to combine the two to form a unique perspective of our world. I love traveling and learning about other cultures.

I am a lover of mass media--I will watch, analyze, and discuss almost any genre of television or movies.

## experience
